

## Pamplona/Iruña - Puente la Reina/Gares

You can take a parting look at some of **Pamplona's** most relevant sights such as the plaza Consistorial, the Vuelta del Castillo or the facilities of the University of Navarre, while you exit the city. Crossing the bridge of Acella over the river Sadar, you reach Cizur Menor, having covered 5 kilometres.

This residential area opens into cereal fields rising up towards the village of **Zariquiegui**, with its Romanesque church of San Andrés. Half of the day's walk is already behind. Greenery surrounds us while we climb towards the peak of Sierra del Perdón, where many decide to take a break and say farewell to the basin of Pamplona, looking back through the sculptures crowning this panoramic height.

After that, you descend towards **Uterga** and **Muruzábal**, less than 5 kilometres away from our destination for the day. The Camino leads us to **Obanos** and onto **Puente de la Reina**, with its iron monument to pilgrims. This is a very relevant spot where the Routes coming from Roncesvalles and Somport meet. Puente de la Reina is the end of the walk for the day and a village with a lot of history linked to the Camino. Here once can visit the Romanesque bridge, the church of Iglesia del Crucifijo and, of course, the church of Santiago (Saint James).

### El consejo del cartero

"From Muruzábal we recommend a detour of 2km to see the Romanesque church of Santa María de Eunat in order not to miss out on a beautiful and mysterious national monument with an octagonal ground floor and a history linked to the Templars. This is one of the jewels of Navarre architecture. Precisely at the Correos post office of Puente de la Reina we have a pilgrims' stamp with the image of this particular monument". **Juan Carlos Ruiz, Correos of Puente la Reina.**
